ALL THE NATURAL FAVOURITES

- COCONUT
- WOOL
- LATEX
- SILK
- ECO-FOAM
- ORGANIC COTTON
- NATURAL BAMBOO
- CASHMERE
- MOHAIR

A part of our range of mattresses fillings include eco-friendly "Origin" foam, traditional springs, coconut fibre, wool, latex, cashmere, mohair, silk and latex. We also provide a range of mattress coverings which include 85% organic cotton, aloe-vera and natural bamboo. All have beautiful bound edges and zip-off covers that are easily removed for washing.

natural solutions for baby & children's mattresses.

COCONUT FIBRE: Coconut fibre is collected from the coconut husk. Once transformed into sheets, it is used in products such as our mattresses, providing excellent ventilation. The sheets are also sprayed with natural latex to provide both rigidity and elasticity. The coir fibre is very tough. It is elastic and strong, and it hardly deteriorates at all over time. The fibre provides good temperature management for mattresses.

WOOL: Pure new wool curls naturally. Wool can absorb twice as much moisture as cotton can, and 30 times as much as polyester! Wool has naturally high flame resistance because of its low flammability. Products made from pure new wool do not cause allergies. New wool absorbs moisture from the surroundings, stopping fungal growth and so breaking the food chain that house mite depends on.

LATEX: Natural latex feels extremely soft and supportive. It is antimicrobial, and resists mould and dust mites. Natural latex is a natural renewable material. 100% pure natural latex is inherently hypo-allergenic, anti-microbial and dust-mite-resistant, making it perfect for allergy sufferers or anyone simply wanting their child to breathe fresh, clean air while they sleep. In addition, natural latex is breathable, keeping the child warmer in the winter and cooler in the summer. Latex comes from the hevea brasiliensis, or the rubber tree. It is the most naturally, durable, cushioning material available. So while it might cost a little more initially, latex will provide a child with the perfect balance of comfort and support for years to come.

NATURAL BAMBOO—fabric cover

Naturally soft, comfortable and eco-friendly bamboo fabric is produced using natural, additive-free bamboo fibres. It is naturally anti-bacterial and deodorising. The fabric breathes. It absorbs and evaporates moisture plus it is wonderfully soft and silky to touch. It provides a comfortable and fresh sleeping area.

ALOE-VERA with LAVENDER—fabric cover

Beautiful, soft and silky aloe-vera fabric infused with lavender. Provides a soothing environment for baby to sleep. Naturally anti-bacterial and moisture absorbing. Sensual, silky to touch embossed fabric.

ORGANIC COTTON—fabric cover 85% organic cotton 15% polyester. Produced without pesticides or chemical fertilizers. Bleached and dyed without the use of chlorine, toxins or formaldehyde.

ORIGIN FOAM

The first step towards achieving a vision of a new generation of sustainable foam, using renewable materials such as natural oil seeds from crops such as castor, soya bean and sunflower oil. By harnessing this renewable resource, and using it to replace the petrochemicals traditionally used to produce polyurethane foam, **Origin** has a much smaller carbon footprint. That is something that has become more and more important to many of us today

CASHMERE, SILK & MOHAIR

Luxurious and sensuous fillings. Naturally breathable and insulating. Used as extra layers over coir pads and springs.

WE HAVE A WIDE AND DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
